

IOSH MANAGING SAFELY

Institution of Occupational Safety and Health (IOSH)

Managing safely is a course for managers and supervisors in any sector and any Organization. It's designed to give managers all they need to know to help them handle health and safety in their teams. The flexible new high impact programmed covers all the main health and safety issues. Managing Safely can be delivered **at 3 or 4 days and has seven modules:**

COURSE CONTENT

Module 1: Introducing Managing Safely

Some managers may see health and safety as an add-on to their role – even an intrusion. The first module makes it clear that managers are accountable for their teams, and makes a persuasive case for managing safely.

Module 2: Assessing Risks

This module defines and demystifies 'risk' and 'risk assessment'. Risk assessments and a simple scoring system are introduced, and delegates carry out a series of assessments

Module 3: Controlling Risks

Here, the session tackles cutting risks down, concentrating on the best techniques to control key risks, and how to choose the right method.

Module 4: Understanding Your Responsibilities

This module looks at the demands of the law and how the legal system works, and introduces a health and safety management system.

Module 5: Identifying Hazards

The main issues any operation has to deal with are covered in this module – entrances and exits, work traffic, fire, chemicals, electricity, physical and verbal abuse, bullying, stress, noise, housekeeping and the working environment, slips, trips and falls, working at height, computers and manual handling – *the client can choose any four that most suites his workplace*

Module 6: Investigating Accidents and Incidents

The session starts with why accidents should be investigated, and goes on to cover why things go wrong, and how to carry out an investigation when they do.

Module 7: Measuring Performance

This module explains how checking performance can help to improve health and safety. Delegates learn how to develop basic performance indicators, and get to grips with auditing and proactive and reactive measuring.

Method of Assessment

Students are assessed by a multiple choice examination and a practical risk assessment. Each assessment tests your understanding of the course and the risk assessment tests your ability to put this into practice.

Students need to be proficient in the language in which they study and complete their assessments.

A qualification parchment is issued following successful completion of the two units.
